

SAMIR ABDALLA

samir.os.abdalla@gmail.com | samirosabdalla.dev | github.com/SamirOsAbdalla | linkedin.com/in/samirosabdalla

EDUCATION

University of California Los Angeles

Bachelors of Science in Mathematics of Computation

Los Angeles, CA

Expected March 2024

SKILLS & INTERESTS

Languages: JavaScript, TypeScript, HTML/CSS, Java, C, C++, Python

Technologies: React.js, Next.js, Bootstrap, Node.js, Express.js, MySQL, Redux, MongoDB

Interests: Pokémon, Chipotle, Jujutsu Kaisen, basketball

EXPERIENCE

Software Engineer Intern

December 2022 - July 2023

JPM Installations

- Developed backend interfaces with Java to provide API's for retrieval of client information
- Designed backend database utilizing MySQL to store client and payment information
- Created technical documentation for 2 new database features and keys

Software Engineer Intern

March 2021 - June 2021

NATEC International, Inc.

- Automated client registration which improved onboarding rate of new clientele by over **37%**
- Improved performance for retrieval of client records from MySQL database by reducing fetch times by over **70%**

C++ Tutor

June 2022 - January 2023

- Tutored UCLA's CS32 course to **over 20+ UCLA students** where **~70%** of them went on to receive a B+ or higher
- Educated students in core CS data structures and the C++ STL

PROJECTS

SpeedEats | React, Next.js, MongoDB, Typescript, Bootstrap

November 2023 - January 2024

- A web application that removes indecision on where to eat based off of the user's current location
- Aggregated multiple APIs to provide users with the best dining option as well as to reduce load to any one API
- Established a user base of over **150+ people**
- **Live Site:** <https://www.speedeats.co> **Github:** <https://github.com/SamirOsAbdalla/speed-eats>

Cluster | React, Next.js, MongoDB, Typescript

May 2023 - October 2023

- A web application for users to manage their groups and the tasks in those groups
- Designed features such as sleek tables to maintain group/task state and a comment system for inter-user communication
- Maintained **over 50+ users** ranging from high school students in group projects to college roommates
- **Live Site:** <https://www.clustersapp.net> **Github:** <https://github.com/SamirOsAbdalla/cluster>

Data Structure Visualizer | React, Typescript

September 2023 - October 2023

- Animated core data structures to give insights as to how they really work
- Created detailed explanations on the methods and operations that each data structure has
- Inspired my 10-12th grade tutees to pursue programming with an introduction to Computer Science fundamentals
- **Live Site:** <https://ds-visualizer-jade.vercel.app/> **Github:** <https://github.com/SamirOsAbdalla/ds-visualizer>
